Dr. Joshua Lederberg
Department of Genetics
College of Agriculture
University of Wisconsin
Madison 6, Wisconsin

Dear Dr. Lederberg:

We would like to have phage-susceptible cultures of the following mutants: Y-26, Y-9, Y-10 and 58-5255, if possible. We greatly appreciate your cooperation in supplying these strains.

Neither Fox nor I have done anything with yeast precipitins in the past year. Fox, however, hopes to resume work on the problem in the near future.

Sincerely yours,

Mary Jane Ward, Chemist
Bio-organic Chemical
Research Department
